ABOUT ME

Hello! I'm Midhunraj, a budding web & graphic designer fueled by a passion for creativity and a fascination with technology. While I may be new to the industry, I bring a fresh perspective and a hunger to learn and grow in this dynamic field. My journey into web design began with a curiosity for how websites are crafted and a desire to bring ideas to life in the digital realm. I've recently completed Web designing online course where I honed my skills in HTML, CSS, JavaScript, and other essential tools of the trade.

WORK EXPERIENCE

Personal Website Creation   2023

Creating my own personal website has been an exciting journey where I've had the opportunity to apply my skills, express my creativity, and establish my online presence. Here's an overview of my experience:

- Conceptualization and Planning: I began by outlining the goals and objectives of my website. Whether it was to showcase my portfolio, share my expertise, or simply express my personality, I took the time to define the purpose and target audience of the site.
- Design and Visual Identity: With a clear vision in mind, I moved on to the design phase. Drawing inspiration from my own style preferences and design trends, I crafted a visual identity for my website.
- Development and Implementation: Armed with design mockups, I delved into the development process. Leveraging my knowledge of HTML, CSS, and JavaScript, I brought my designs to life.
- Content Creation and Optimization: Content is king, so I devoted ample time and effort to crafting compelling and informative content for my website.
- Testing and Iteration: Once the initial version of my website was ready, I conducted thorough testing to identify and fix any bugs, inconsistencies, or usability issues. I solicited feedback from friends, peers, and mentors to gain valuable insights and perspectives. Based on their input, I made refinements and iterations to enhance the overall user experience and functionality of the site.
- **Launch and Promotion:** Finally, it was time to launch my website and share it with the world.
